treadlightly!® LEAVING A GOOD IMPRESSION™ CE All specifications, claims, prices and information contained within are based upon current knowledge as of June 1, 2013 and are subject to change without notice. Prices do not include freight, handling or setup charges. ATVs and ROVs can be hazardous to operate. Improper use can cause severe injury or death. Each rider must wear a seat belt (on ROVs), an approved helmet, eye protection and protective clothing; use handholds/steering wheel and stay completely inside the vehicle. ROV operators must have a valid driver's license (no operators under age 16) and all riders must be able to sit with their back against the seat, feet flat on the floor and hands on handholds/steering wheel. Each rider must read and understand the operator's manual before riding. Follow all instructions and warnings. Avoid abrupt maneuvers, paved surfaces, hard acceleration when turning, and sidehilling; slow down before entering a turn. Never engage in stunt driving. Avoid excessive speeds and be particularly careful on difficult terrain. Never carry a passenger in the cargo box or exceed seating capacity on an ROV; never carry a passenger on a single-rider ATV. **ATVs are recommended only for users over 12 years old. Only ride an ATV that is right for your age. Supervise riders younger than 16.** Never operate on public roads unless designated for off-highway vehicle access – collisions with cars and trucks can occur. Never drive or ride under influence of alcohol or drugs. Do not shoot from or lean firearms or bows against the ATV or ROV. Arctic Cat recommends that all riders take a training course. For safety or training information in the U.S., call the ATV Safety Institute at (800) 887-2887. In Canada, please contact the Canada Safety Council at (613) 739-1535 or see your dealer. For ROV training visit http://rohva.org. Along with concerned conservationists everywhere, Arctic Cat urges you to "Tread Lightly" on public and private lands. Ride only on designated areas or trails. Preserve your future riding opportunities by showing respect for the environment, local laws and the rights of others when riding. OFFERING THE TOOLS TO MAKE YOUR RIDING EXPERIENCE TRULY YOURS. THAT'S THE ARCTIC CAT WAY.

So what are you looking for in an ATV or Side by Side? Will you use it to farm? Hunt? Fish? Or will you use it solely to rule the sand? Whatever the answer, that's totally up to you. But what we can tell you, with complete certainty, is that Arctic Cat® has all the accessories and gear to make that experience totally yours. From front cover to back. From bumpers and plows to sweatshirts and helmets. It's all here for you. Because you are Cat to the Core!™ So here it is. Your 2014 Arctic Cat Accessories and Arcticwear® catalog.

WILDCAT |

When you're on a Wildcat," you ride with everything you got. You don't just go over a sand hill. You attack it. Smack it. Blast it with 951cc of liquid-cooled force. There's no halfway. It's pedal all the way down. That's what you and the Wildcat are all about. And with this rugged ride philosophy, nothing but the best, toughest accessories will do justice. So while you run through the following pages of this book, just remember one thing ... Arctic Cat always has your back.

HIGHER GROUND CLEARANCE for improved mobility in various terrains

EASY CLEANING Sprocket design allows for easy cleaning of your brakes and wheel hubs

NEW LARGE IDLER WHEELS & FRAME DESIGN increase pitch to lift you up and over difficult obstacles

PATENTED NEXT-GENERATION STRAIGHT-TRACKING ULTRALUG TRACK GUIDING SYSTEM gives you a true all-season track kit that requires no-hyfax but optimizes wheel and sprocket profile against the rubber track, for noise reduction and freewheeling

FAST TENSIONING SYSTEM No track pressure gauge required to adjust the track; requires only a torque wrench and standard wrench

WIDE TRACKS WITH IMPROVED LUG DESIGN are 12½ in. wide in front for optimal traction and flotation

EXTRA-WIDE 1½-IN. (38MM) BOGGY WHEELS to hold up and aid performance of heavy-duty Prowler applications

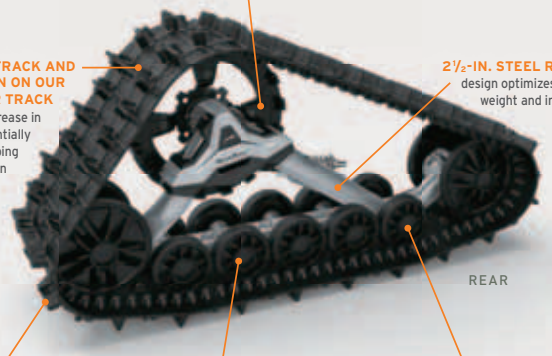
FRONT AND REAR SPRING-LOADED ANTI-ROTATION SYSTEM WITH RUBBER DAMPER allows maximum movement of the track and smoother steering in rough terrain

UPGRADED, FULLY SEALED HUBS for longer life and do not require maintenance to slow you down

INDEPENDENT TANDEM PIVOTING WHEELS ease steering effort, increase stability and help provide a smoother ride

IMPROVED TRACK AND LUG DESIGN ON OUR 14-IN.-WIDE REAR TRACK coupled with a 25% increase in ground patch has substantially increased flotation, climbing ability and traction

2½-IN. STEEL ROUND TUBE design optimizes and distributes weight and increases durability



EXCELLENT WEAR RESISTANCE provided by 1⅛-in. lug height on the front and improved 1¼-in. in the rear, furthering your ability to grab terrain

ALL WHEELS ARE MOUNTED ON TWO REPLACEABLE SEALED BEARINGS AND ARE DUAL CAP-PROTECTED for extra debris protection, less maintenance and longer life

RUBBER-COATED WHEELS to help avoid ice buildup

PROWLER TIGERTRAX 2

If you're looking for the next level in performance, the Arctic Cat team has delivered! Building on the tried-and-true original TigerTrax system, we have brought you the next evolution in performance all-season tracks. Custom fit and optimized for your Arctic Cat, the TigerTrax 2 will take you further, allow you to climb higher, and is the most terrain-capable Side by Side all-season track system available today. Improved flotation, increased ground clearance, optimized frame geometry, aggressive track design, and significant increase in ground traction will give you the edge in deep snow, sand, swamps and the nastiest terrain. Simply stated, when there is terrain to be conquered and when you simply just need to get there, TigerTrax 2 will take you there.

'06-'14 PROWLER; '11-'14 HDX

Our Prowler SPEEDPoint™ system makes the work you do feel more like play. It allows the changing of any implement – from a planter to a landscape rake – in just minutes! That's precisely the kind of convenience Prowler SPEEDPoint gives you, without ever having to lock the rear suspension and sacrifice maneuverability under heavy payloads. Just back up to the Prowler SPEEDPoint attachment, hook it onto a 2-in. ball, connect the wiring harness and you're good to go. Raise and lower implements with the flick of a dash-mounted switch. Simple as that. No more grunting or groaning. It's almost like this whole business of hard work just became fun again.

NOTE: Prowler SPEEDPoint requires a 12-volt Electric/Hydraulic Actuator (1436-269, page 56, sold separately) for implement adjustment. The actuator is easily removed with two pins and a wire connection and transfers to all Prowler SPEEDPoint attachments. Switch & Harness Kit required (1436-301 or 1436-823, page 56).

MOST TERRAIN-CAPABLE TIGERTRAX 2

HIGHER GROUND CLEARANCE
for improved mobility in various terrains

EASY CLEANING
Sprocket design allows for easy cleaning of your brakes and wheel hubs

NEW IDLER WHEELS & FRAME DESIGN
increase pitch to lift you up and over difficult obstacles

PATENTED NEXT-GENERATION STRAIGHT-TRACKING ULTRALUG TRACK GUIDING SYSTEM
gives you a true all-season track kit that requires no-hyfax but optimizes wheel and sprocket profile against the rubber track, for noise reduction and freewheeling

FAST TENSIONING SYSTEM
No more track pressure gauge required to adjust the track; requires only a torque wrench and standard wrench

WIDE TRACKS WITH IMPROVED LUG DESIGN
are 11½ in. wide in front for optimal traction and flotation

17% LIGHTER TRACK SYSTEM
than our original TigerTrax

FRONT

FRONT AND REAR SPRING-LOADED ANTI-ROTATION SYSTEM WITH RUBBER DAMPER
allows maximum movement of the track and smoother steering in rough terrain

UPGRADED, FULLY SEALED HUBS for longer life and do not require maintenance to slow you down

INDEPENDENT TANDEM PIVOTING WHEELS
ease steering effort, increase stability and help provide a smoother ride

IMPROVED TRACK AND LUG DESIGN ON OUR NEW 13-IN.-WIDE REAR TRACK
(1½-in. wider than our original TigerTrax) coupled with a 20% increase in ground patch has substantially increased flotation, climbing ability and traction

2½-IN. STEEL ROUND TUBE
design optimizes and distributes weight and increases durability

REAR

EXCELLENT WEAR RESISTANCE
provided by 1⅛-in. lug height on the front and improved 1¼-in. in the rear, furthering your ability to grab terrain

ALL WHEELS ARE MOUNTED ON TWO REPLACEABLE SEALED BEARINGS AND DUAL CAP-PROTECTED
for extra debris protection, less maintenance and longer life

RUBBER-COATED WHEELS
to help avoid ice buildup

ATV TIGERTRAX 2

If you're looking for the next level in performance, the Arctic Cat team has delivered! Building on the tried-and-true original TigerTrax system, we have brought you the next evolution in performance all-season tracks. Custom fit and optimized for your Arctic Cat, the TigerTrax 2 will take you further, allow you to climb higher, and is the most terrain-capable ATV all-season track system available today. Improved flotation, increased ground clearance, optimized frame geometry, aggressive track design and significant increase in ground traction will give you the edge in deep snow, sand, swamps and the nastiest terrain. Simply stated, when there is terrain to be conquered and when you simply just need to get there, TigerTrax 2 will take you there.

NOTE: Requires Track Kit, Mount Kit & Clutch Kit, sold separately. Clutch Kit not required for TRV 1000.

SPEEDPOINT IMPLEMENTS

Exclusively Arctic Cat, our ATV SPEEDPoint System is innovation at its finest. Designed to meet the needs of the hobby farmer, wildlife food plot maker, and tree nursery and landscape designer, the Arctic Cat SPEEDPoint System utilizes an easy-access three-point attachment on the ATV, so you can apply down pressure on the SPEEDPoint implement. Constructed of heavy-duty steel, our ATV SPEEDPoint System does not require the rear suspension to be locked, which increases ATV maneuverability under heavy workloads.

3-POINT HITCH

Plugs into 2-in. receiver and two frame mounting brackets | Actuator adjusts any attachment up or down with the flick of a switch (wiring and switch included) | Actuator is easy to use and allows down pressure on attachments, applying 600 lbs. of force at one inch per second | Lets you attach implements in seconds – only two pins needed | Mounting brackets required

TWO OILS DELIVER PERFORMANCE & PROTECTION

New this year is a 15W-50 weight in our ACX line, specifically designed for hot-weather use in our vehicles. 0W-40 ACX gives improved cold-weather starting. Both ensure maximum performance for each specific condition and are the most advanced formulation ever developed for your Arctic Cat ATV, Prowler and Wildcat.

Premium synthetic base stocks deliver consistent lubrication in all conditions, plus superior rust and corrosion protection even during periods of nonuse | Improved cold-weather starting and optimum protection at extreme operating temperatures, from frigid cold to desert heat | 15 times more shear stable than standard engine oils for greater resistance to thermal and chemical breakdown

ACX 0W-40 SYNTHETIC OIL

- All-weather protection
- Advanced multigrade formula
- Improved cold-weather starting
- Superior rust and corrosion protection even during periods of nonuse

Offers maximum engine performance along with unique shear-stable additive formula that protects against engine wear, carbon buildup and sludge formation. OW-40 is Wet Clutch Certified for use in Arctic Cat wet-clutch engines. Automotive engine oils DO NOT meet the requirements for use in Arctic Cat ATVs equipped with a wet clutch.

1436-434 QUART
1436-435 GALLON

ACX 15W-50 SYNTHETIC OIL NEW

Arctic Cat's Full Synthetic 15W-50 is a new, heavier-viscosity formula of the original, proven Synthetic ACX 4-Cycle oil.

Formulated specifically for hot weather use in Wildcat, Prowler and ATVs, it provides ultimate hot temperature engine protection and prevents thermal breakdown in severe conditions. Can also be used in professional applications such as racing, construction, farm and ranch where the machine faces heavier loads and greater engine stress.

NOTE: NOT recommended for use in ambient temperatures below 32°F – heavier viscosity will make starting more difficult in extreme cold. Original Synthetic ACX (0W-40) engine oil recommended for all-season use.
